

Improve public transport! As a Data Analyst Intern (full-time)

About MotionTag

MOTIONTAG's mission is to create seamless, sustainable and smart mobility for the benefit of both people and the environment. Our technology infers insights from smartphone sensors about how, when and where people use transport services. We deliver the intelligence to help our clients understand their customer behaviors, optimize existing transport systems and create new, seamless mobility experiences while also protecting the privacy of end users.

We are a small team of currently 28 motivated employees. We are well funded and work on interesting projects in mobility.

What's in it for you?

- Work with large-scale mobility data sets
- Be part of our growing core team from a diversity of expertise and cultural backgrounds
- Develop a product with us that changes the future of mobility
- Experience KPI driven and lean product development
- Paid internship with long term employment opportunity

We need your support in:

- Devising new ways to interpret sensor and geo data from mobile devices
- Validating, analysing and visualizing mobility data using Python and/or R
- Developing aggregated insights from individual location and mobility data
- Contributing towards our KPIs that drive product development

Your profile

- Student of Computer Science, Geo-Informatics, Physics, Mathematics or comparable
- Proven experience and developing skills in Python and / or R
- Professional proficiency in English, German is a plus
- Interest in data analysis and visualization
- Driven, reliable, good level of self-organization, team player!
- Knowledge in PostgreSQL or Machine Learning are a plus
- Experience with Leaflet or Mapbox is a plus
- Experience in data visualization software like D3.js, Java, Processing or similar tools is a plus

Start date: ASAP
