

Improve public transport as a

Junior iOS developer (full-time)

About MOTIONTAG

MOTIONTAG's mission is to create seamless, sustainable and smart mobility for the benefit of both people and the environment. Our technology infers insights from smartphone sensors about how, when and where people use transport services. We deliver the intelligence to help our clients understand their customer behaviors, optimize existing transport systems and create new, seamless mobility experiences while also protecting the privacy of end users.

We are a small team of currently 28 employees. We are well funded and work on interesting projects in mobility.

What's in it for you?

- Develop a product with us that changes the future of mobility
- Be part of our growing core team from a diversity of expertise and cultural backgrounds
- Learn the best practices in iOS development through mentorship from our team of experts, and working with state of the art iOS apps and SDKs
- Dynamic start-up atmosphere, including fresh fruit, lots of coffee, a nice round of table tennis and fun team-events

We need your support in:

- Implementing features in our innovative mobility SDKs and Apps
- Writing unit tests, and providing feedback through actual testing of our products
- Maintain the iOS CI/CD stack through Jenkins and Fastlane
- Implementing new, and improving existing layouts

Your profile

- Minimum 2 years of software development experience
- Proven experience and developing skills in Objective-C and Swift
- Good grasp of object-oriented and protocol-oriented programming
- C++ knowledge is a plus
- Professional proficiency in English, German is a plus
- Driven, reliable, good level of self-organization, team player!

Start date: ASAP
