

Improve public transport! As a Student Data Analyst (16-20h/week)

About MotionTag

MotionTag develops a platform for seamless pay-as-you-go ticketing. Travel first, get charged the best price afterwards. By leveraging smartphone sensors and applying machine learning, we detect transport modes and thereby enable a new way of paperless ticketing.

We are a small but growing international team from diverse backgrounds, working with important public transportation providers. We have secured funding from experts in the transport industry and are now looking for tech loving people who want to be part of the journey.

What's in it for you?

- Be part of our growing core team from a diversity of expertise and cultural backgrounds
- Develop a product with us that changes the future of mobility
- Work with a large amount of validated travel profiles
- Experience KPI driven and lean product development

We need your support in:

- Validating, analysing and evaluating mobility data using Python
- Measuring and assessing data quality
- Developing tools to automate data validation and analysis
- Contributing towards our KPIs that drive product development

Your profile

- Student of Computer Science, Geo-Informatics, Physics, Math or comparable
- Interest in data analysis
- Proven experience and developing skills in Python
- Professional proficiency in English
- Driven, reliable, good level of self-organization, team player!
- Knowledge in PostgreSQL and Java is a plus
- Experience with Leaflet, QGis or Mapbox is a plus

Start date: 01 March 2018
